

Project Report: Milestone 2

Project Name: Import Data using Transform Maps
(Spreadsheet)

Milestone: Milestone 2 - Creation of Import Set Table and Transform Map

Assignee: Sree Vaishnavi N, Rabina S

Complexity & Duration: Medium | 40 Minutes

1. Executive Summary

The primary goal of Milestone 2 is to establish the staging area and transformation logic for migrating external spreadsheet data into ServiceNow. This involved creating a temporary Import Set staging table and configuring a Transform Map to systematically link incoming source attributes to the target database fields.

2. Completed Scope & Key Subtasks

Subtask 1: Create Import Set Staging Table

- * Description: Uploaded the external spreadsheet to instantiate a temporary staging table in ServiceNow for raw data processing and validation.

- * Navigation Path: Application Navigator > System Import Sets > Load Data

- * Import Table Configuration:

- * Table Label: Employee Import

- * Table Name: u_employee_import (Auto-generated)

- * Source File: Sample Spreadsheet.xlsx

- * Outcome: Raw data successfully staged inside u_employee_import.

Subtask 2: Create & Configure Transform Map

- * Description: Built a Transform Map rule to map raw fields from the staging table to their corresponding fields in the custom target table.

- * Transform Map Details:

- * Name: Sample Spreadsheet Import

- * Source Table: u_employee_import

- * Target Table: Employee Test (u_employee_test)

* Field Mapping Configuration: Executed field matching to establish key visual relationships:

- * Employee ID \ Employee ID
- * Name \ Name
- * Email \ Email
- * Department \ Department
- * Location \ Location

3. Verification & Execution

*Transformation Trigger: Executed the Transform action from the Transform Map interface.

*Execution Status: Confirmed successful processing with a green completion status message in ServiceNow.

4. Screenshots

Importset Table:

The screenshot displays the ServiceNow 'Load Data' interface. The 'Import set table' section is active, with 'Create table' selected. The 'Label' field is set to 'Employee Import' and the 'Name' field is set to 'u_employee_import'. The 'Source of the import' section has 'File' selected. The 'File' field shows 'Choose File' and 'No file chosen'. The 'Sheet number' is set to '1' and the 'Header row' is set to '1'. A 'Submit' button is visible at the bottom of the form. The browser's address bar shows 'servicenow.com' and the page title is 'Load Data | ServiceNow'.
